

CDOR Vendor Checklist Questions

driverightacademy.com - Accessibility Testing Plan

Action Item 2: “Answer Questions 3-16 on the CDOR Vendor Checklist”

3. What metrics are in place to track progress with the Accessibility plan/initiative?

The use of the VPAT and ACR provide ample metrics to measure conformance and progress towards improving the accessibility of the Drive Right Academy website.

4. If yes to question 1, what tools/methods were used to test and complete the ACR? (If not satisfactory under “Evaluation Methods Used”)

- Knowledge of General Product Functionality
 - The person who performed the evaluation is a professional software engineer and the creator of the website. As a result, the tester was able to easily examine how each aspect of the site conformed to the Web Content Accessibility Guidelines provided.
- VoiceOver
 - I walked through the website using VoiceOver on Mac OS and Google Chrome
- Chrome Dev Tools and Microsoft VS Code
 - Tools used to examine the source code of the website and view the accessibility attributes in the HTML
- ChatGPT
 - Supplemental tool used to better understand the WCAG and how to meet them

5. Can you provide a copy of the accessibility test plan for the product? Accessibility test results? Issues found and corrective actions planned?

Yes. The ACR requested provides the framework used for testing and the test results. The minimal issues that were found have already been corrected and are live in production for the website as of January 24th, 2025.

6. What client platforms, operating systems (including mobile), browsers, assistive technologies, and versions of all of those...were used as test environments?

- Google Chrome (web browser), Version 131.0.6778.266
- VoiceOver on macOS, Version 13.2.1 (Ventura)
- Local Testing Environment
 - React 18.2.56
 - Vite 5.1.4
- Production Verification: driverightacademy.com, version 1.0.0

7. Do you have a corrective actions process that includes accessibility issues and how are they prioritized?

Yes. The VPAT and ACR are a good way to find issues and the WCAG proved what corrective actions to take. The VPAT and WCAG prioritize them.

8. At what points in the design and development process do you integrate accessibility criteria or perform accessibility-related activities for compliance with accessibility standards?

At every stage of the design and development process.

9. How do you keep up with the legal requirements and laws regarding accessibility?

- By completing the ACR which follows the WCAG
- By consistently reviewing any changes to the WCAG

10. What accessibility training courses and curriculums are required of your development/test resources to ensure accessibility-compliant deliverables? Is accessibility training or support updated on a regular basis for internal teams?

None. I am a solo, freelance web developer so accessibility training is self directed. However, I do regularly review changing guidelines.

11. If your product is not compliant, do you have a committed plan or roadmap to achieving compliance and by when?

N/A. driverightacademy.com is compliant.

12. Do you work with third-party accessibility vendors to certify your product is compliant to accessibility standards? If yes, can you provide their attestation?

No.

13. Do you have an accessibility policy and are there initiatives in place throughout the organization in support of that policy?

No. I am a freelance web developer, so accessibility training is self directed. However, I do regularly review and stay up to date on accessibility standards.

14. Do you have an accessibility team?

No.

15. Do you have any people on your team or a third party trained in the use of JAWS, Voiceover, or other screen readers as a test tool? Do you utilize actual screen reader users in the UX testing of your products?

I am trained in VoiceOver basics. Yes, I use VoiceOver to walk through products as part of my testing.

16. Can you provide a demonstration of the product by an actual JAWS user?

No.
